

9. BARRIDO POS DESHABILITADO

Localizar el modulo de [Perfil de POS](#) y agregaremos el siguiente filtro:

The screenshot shows the 'Perfil de POS' application interface. On the left, there is a sidebar with a search bar and navigation options. The main area displays a list of POS profiles with columns for 'Nombre' and 'Categoria'. A filter configuration dialog is open, showing a filter rule: 'Deshabilitado' (Disabled) with the operator 'Iguales' (Equals) and the value 'No'. The dialog includes buttons for '+ Add a Filter', 'Borrar filtros' (Remove filters), and 'Apply Filters'. Below the dialog, a message states 'No hay Perfil de POS' (No POS Profile) with a 'Crear: Perfil de POS' (Create: POS Profile) button.

Si sale alguna agencia habilitada, se procedera a deshabilitarla.
