The screenshot shows the Apache OpenOffice homepage. At the top left is the logo with the text "The Free and Open Productivity Suite" and "390,000,000+ Downloads!". A search bar and a language dropdown menu (set to English [US] (en-US)) are at the top right. Below the header, a navigation bar includes links for Product, Download, Support, Blog, Extensions & Templates, Get Involved, Focus Areas, and Native Languages. The main content area features several user-focused sections: "I want to learn more about OpenOffice", "I want to download Apache OpenOffice (Most recent release: 4.1.16)", "I need help with my OpenOffice", "I want to do more with my OpenOffice", "I want to participate in OpenOffice", and "I want to stay in touch with OpenOffice". On the right side, there are sections for "Recent Blog Posts" and "Recent News", both listing recent announcements and release notes. At the bottom, there is a "COMMUNITY" section and a footer with legal notices and the Apache Software Foundation (ASF) logo.

The screenshot shows the Apache OpenOffice download page. The header is identical to the homepage. The main heading is "Released: Apache OpenOffice 4.1.16". Below this, a navigation bar is present. The central content area is a large green box with a red border, containing the download instructions. It includes a dropdown menu for "Windows 32-bit (x86) (EXE)", a language dropdown set to "Spanish", and a version dropdown set to "4.1.16". Below these are two buttons: "Download full installation" and "Download language pack". To the right of this box is a "Release Information" section with links for System Requirements, License, Source, Building Guide, Software Development Kit (SDK), and Development Builds. Below that is a "Documentation" section with links for Release Schedules, Historic Release Schedule, Installation Guides, User Guides, Java and Apache OpenOffice, and End-Of-Life Information. Further down is an "Additional Resources" section with links for Support, Localizations, Download Statistics, Alternative download link #1, Alternative download link #2, 3rd party ports and distributions, and Archived and legacy releases. At the bottom of the page, there are logos for SOURCEFORGE and W3C XHTML 1.0.
